

Meeting with Mike Rilee
September 6, 2002

Agenda

- (1) Ruler/Worker distinction
- (2) An ideal simulation (errors never occur)
- (3) Interrupts – any response from the simulation that has arguments (such as an image or a trajectory)
- (4) stderr is standard interrupts
- (5) stdout only returns ok or error
- (6) Taking pictures?
- (7) Look at new system diagram
- (8) No prompt for simulation
- (9) Simulation updates
