

Meeting with Mike Rilee and Walt Truskowski  
September 4, 2002

## Minutes

### (1) Progress Report

ANTS1 and ANTS2 presented their progress. ANTS1 started work on their implementation and have a working “framework”. ANTS2 is continuing work on their design document. A new low-level system was recently brainstormed and this was presented to Mike and Walt as a possibility. The new design will be illustrated and documented. Plans for the near future include finishing the design document and drafting the design for the possible low-level design we suggested. Later this week the power point slides will be created for next week’s presentation.

### (2) Goal, Plan, Task and Action specification

ANTS1 presented Mike and Walt with a set of Goals, Plans and Tasks. Mike said he would review these. Mike further developed the simulated hardware. He provided a document to detail his progress. These will be reviewed, further developed and discussed at a meeting set for tomorrow (Thursday 9/04) at 8:30am.

### (3) Recovery system

The recovery system was discussed with Mike. He said he would look into this.
